Odyssey Massive Racks
Starting at \$ 950.

For several years we have been searching for audio racks that not only sound superior, but are also affordable and aesthetically pleasing and massively build. Well, no such luck. Most of the better furniture are in the \$ 4,000 - 6,000 range. Having our own CNC and Wood Shops, we decided to design racks for ourselves. The results were so fantastic that we decided to go into production, completely sourced in the USA, and crafted in Indianapolis, Indiana!!!

First off, all of the legs are aluminum stock, that is cut to custom length and are then heavily machined to incorporate inner bracing for 1/2 connecting rods and possible sand-fills. Then all metal is hand brushed and anodized. There are literally dozens of custom colors available.
